Rail spurs branched into and throughout the Borek Falecki Soda Ash factory area from a main rail line leading south from Krakow. All spurs were European standard gauge. The raw materials (hard white rock) for this factory were transported from a quarry, (point 2, on sketch) via railroad track, (point 3, on sketch).

there were about 7 to 10 twenty-ton cars to each transport which hauled this hard white rock from the quarry; there were 7 to 10 such transports daily. This factory operated seven days a week, 24 hours a day, with an estimated labor force of 6000 civilian employees. The end product was soda in lump, crystal and ash form. The destination of this product was the USSR.
